

INVACARE® TOP END®

Eliminator™ OSR

Racing Wheelchair

Yes, you can.®

The **Invacare® Top End® Eliminator™ OSR** racing chair is designed for speed. The super-stiff roll-formed horizontal maintube, combined with a relaxed headtube angle for exceptional stability and aerodynamics, make it the choice of champion racers like Ernst van Dyk, Krige Schabert, Kurt Furnley, Chantal Petitclerc and Edith Hunkeler. So if you have your sights set on winning, the Eliminator OSR racing chair will help you get to the finish line **first**.

Options

- Carbon fiber rear wheels
- Corima™ carbon fiber front wheel
- Alignment gauge
- Wheel bag
- Racing suit
- Solid seat/kneel plate
- Fixed footrest
- Cushion

I-Cage

Open V-Cage*

** Shown with cut out camber tube option for more legroom*

V-Cage

U-Cage shown with knee plate

Standard vs. Kneel

The Invacare® Eliminator™ OSR racing chair is custom built to make the most of each athlete's potential by matching up the athlete's ability with the optimum position. The standard position is recommended for athletes who have limited balance and need more of a bucket or squeeze position. The athlete can sit in the traditional position with his/her feet on a footplate or use it in the kneeling position which makes it the ideal choice for beginners. The kneeling position is best for experienced athletes with good balance who only kneel in their chair or need an amputee seat.

Seat Cage Styles

Invacare Top End offers different cage styles to maximize each athlete's transfer skills while maintaining frame stiffness. The I-, V- and Open V-cage styles are offered on the standard OSR racing chair. The Open V-cage style is the most popular because it allows more leg room and easier transfers. The U-cage requires a Top End specialist to fit it properly to the racer. The U-, V- and Open V-cage styles are available on the kneel-only OSR racing chair.
